

Grain Handling Services

Maintaining cleanliness at grain storage facilities requires a hands-on approach. This is where Hydro-Klean's industrial vacuuming and high-pressure water cleaning services come into play. As a member of GEAPS and AAI, Hydro-Klean is dedicated to serving the Midwest agri-business industry.

Hydro-Klean's elevator and grain services are tops in the industry. Our fleet of industrial wet/dry vacuum trucks is the most powerful on the market. These machines can vacuum grain either horizontally or vertically from several hundred feet away. The entire process is dust-free. Our industrial vacuum equipment has the ability to transfer huge amounts of material or waste pneumatically in a short amount of time.

To accompany our industrial vacuum trucks, Hydro-Klean has high-volume, self-contained grain vacuum units that quickly can transfer grain from storage areas to anywhere you want it. Grain and dust do not stand a chance as we pneumatically convey just about any bulk material quickly and economically.

Grain Handling Services

Grain salvage is another way that Hydro-Klean brings value to our agri-business clients. We can remove undesirable grain products, leaving your facility clean and neat. We also provide power-washing services to rid your facility of dust and grime, making your workplace safer and giving your company a better image.

In addition to our industrial cleaning services, Hydro-Klean provides environmental services, ranging from tank clean-outs to emergency spill response, along with packaging and disposal of regulated wastes.

Most importantly, our highly trained service technicians know how to get the job done safely and in compliance with all health and safety regulations. We provide everything required in performing this work, from personal protective equipment and fall protection to confined space entry equipment. Hydro-Klean's seasoned professionals will manage your risk carefully, with no effort on your part.

Hydro-Klean is your one-stop shop to handle all your cleaning, product transfer and environmental needs including:

- Elevator Cleaning
(head house, annex auger ways, unplug legs, underneath elevator bins, scales and pits – including water and wet grain year-round)
- Wet/Dry Vacuum Work
(transfer railroad cars and bin topping)
- Environmental Services
(24-hour emergency spill response, cleanup of liquids or solids, packaging, regulated waste disposal and tank cleaning)
- Grain Salvage
